Subject: Re: Wheatfield Village Water Report

The report does indicate that Total Coliform was tested but none was found. Look below the chart at the notations there for this information.

Best Regards, Rachel Hendricks

Good morning,

Thank you for sending the Wheatfield Village Water Report for HRG's review. After reviewing the Water Report for Wheatfield Village, it is missing a few aspects that will need to be included in order to use it as a substitute for the well sampling. They are as follows:

1. Sampling data for Nitrate, Copper, and Chlorine were included. However, there was no sampling data for Total and Fecal Coliform which are required according to the DEP's Needs Identification Guide (Nitrate-Nitrogen is also required). As a result, Wheatfield Village would need to include those parameters in their next sampling.
2. No information was provided about what lab was used. While it was likely the lab was a DEP accredited lab, no information can be found about the lab. The direct labs results should be included rather than only a summary table that is part of a report.

If you have any questions, please feel free to reach out.

Sincerely,

Matt
